

#WD-207
SUPRA

SUPRA THERMOPLASTIC SEALANT

Supra® Expert is a super-durable one component thermoplastic sealing compound that cures by solvent evaporation. Supra® Expert is formulated to seal outdoor joints between two perpendicular surfaces that are subject to thermal movement, such as window or door frames and siding surfaces. Weatherdek uses the Supra® Expert sealant in both 'Clear' and 'Translucent' options to provide reliable watertight sealing with minimal visual impact.

SUPRA EXPERT®:

- Adheres to almost any surface.
- Rapid skin formation.
- Withstands exterior weathering and UV exposures.

APPLICATION:

- Easy application with conventional caulking equipment.
- Clear and translucent options provide clean looks.
- Recommended minimum application temperature 5°C (41°F).

PACKAGING:

- 300 ml tubes
- 20 tubes / case

STORAGE:

- Do Not Freeze

CAUTION:

- Refer to SDS Sheet before use.
